November 2007

- 210 Pieces were shipped in November
- 95% of standard orders were shipped within 17 working days

Our Cambridge branch completes its first installation

## Cambridge Ontario Branch Now Open

Craig Manufacturing is pleased to announce our new location in Cambridge Ontario.

We've just completed our first installation in the new branch and working towards our grand opening in the new year. Headed by Ben Craig, the new branch will allow us to serve you better by providing sales and install service closer to

your projects in the Ontario region. Stay tuned as we fully refurbish the facility, bring on more team members and launch in the new year.

For more information contact Ben Craig by emailing [bcraig@craig-mfg.com](mailto:bcraig@craig-mfg.com) or call 519-623-9500

## Craig Now Distributing 3B6 Weighing and Grading Systems

What if you could save a significant amount of money and time with just a single piece of technology? If you've ever asked, 3B6 is the answer.

Craig now carries a select line of 3B6 technologies to help your jobsite operate at a higher level of efficiency. 3B6 scales are accurate to within 1% and allow your Excavator, Wheel Loader, Skidsteer or Forlift to measure current load weight as well as total weight loaded per truck. Your operators can safely load trucks closer to 100% capacity resulting in fewer trips which means less fuel and quicker turnaround. Even more impressive is the ability of the 3B6 system to measure the load almost instantaneously ensuring that it stays ahead of even the fastest operator.

Excavator operators will also appreciate the benefits of 3B6's depth control system. Program exact grading measurements from the cab without the need to check the grade or where measurements are impossible such as under water applications. 3B6 can also work with your current lazer system

To find out how you can make your operation more efficient call your Craig representative today. 1-800-565-5007
