Introducing: craigattachments.com

We're proud to introduce our new website craigattachments.com

Inside you'll find an up-to-date listing of all our standard products including attachments for Wheel Loaders, Excavators, Motor Graders, Backhoes and Dozers. We think you'll find that you can get information on our products easier than ever before.

We've also introduced an interactive dealer locator, Google Maps driven contact-us information and an employment page to help keep our team up to the task of serving you; our customers.

We encourage you to poke-around and tell us what you think. Also verify that your dealer information is correct and up-to-date.

If you have any questions or would like to find out more please call 1-800-565-5007 or email sales@craigattachments.com

Hardfacing - Are you tough enough?

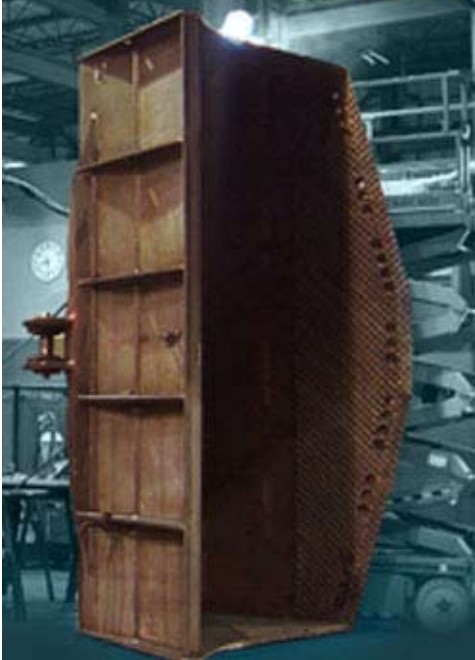

Hardfacing, also known as hardsurfacing, is the application of buildup or wear-resistant weld metals to a part's surface by means of welding or joining in an effort to extend the wear life of the part.

Craig offers optional hardfacing on all of our high-wear attachments.

Nickel based hardfacing wire is applied in a waffle pattern to the already tough Hardox 400 plate. Unlike conventional welding hardfacing uses a ball or globular transfer laying down a very thick bead. When cooled the hardfacing beads are roughly the strength of tool steel.

When you need professional heavy equipment service call 1-800-565-5007 or email sales@craigattachments.com

Craig is proud to support the 2008 Canadian Cancer Society Relay for Life. 25 of our team will be running in this year's relay which raises money to:

- fund the most promising research projects in the country on all types of cancer
- provide information services and support programs in the community
- advocate for public policies that prevent cancer and help those living with it

To find out how you can donate, or to participate in a relay for life event in your community please visit the [Woodstock Relay For Life Website](http://WoodstockRelayForLifeWebsite)
