

WL-301 Series

Wing Assembly

In the mid 50's Craig Manufacturing was the first company to put a wing assembly on a wheel loader. Ever since this historic event we've continued to innovate and refine our industry leading design. The perfect curvature of our wing moldboard is still based on the magic formula for snow curl and discharge we've used since day-one.

- 48" level benching height capacity
- Push pole extends 22" for increased reach
- All hydraulic push pole keeps wing in cut when shelving
- Superior operator visibility
- Plow harness accepts all Craig snowplow models
- Replaceable, reversible, cutting edge for long wear-life
