

WL-HT-GC

High-Tip Garbage-Clamp Bucket

Two rugged clamps allow for large capacities of odd-shaped and difficult materials to be handled efficiently and accurately for loading and sorting. The High Tip Garbage Clamp will increase your dump height to the OEM boom pin height on most machines. This bucket is great for applications such as loading high-side trucks without the need of a ramp.

- Available with dual or full-face clamps for your specific application (pricing will vary)
- Bolt-on, reversible, cutting edge ensures long life
- Available in Craig Quik-Key or OEM coupler & Pin-On configurations
- Solid steel serial number for easy identification and support
- Critical wear areas utilize Brinell 400 wear plate
- Drilled to accept dealer specified ground engaging tools
- Optional third valve required on machine
